Varming Consulting Engineers
is a company wholly owned by
VMRA (Ireland) Ltd.

April 21st 2009

To whom it concerns,

Ref: Skellig Engineering Contractors Performance

Dear Sirs,

I wish to confirm that Skellig Engineering have worked on a variety of Government Building Projects on which, we Varming, were the Services Design Consultant as appointed by the Office of Public Works.

The main Government Projects that Skellig have successfully completed under our charge are as listed below. They have acted in the role of Main Contractor and / or Mechanical Sub-Contractor depending on the specific Project and scope of works required.

- Dept of Social & Family Affairs – Concolbert House : Offices & Computer Rms Revamp & Air conditioning upgrade : Main Contractor & Mechanical Sub-Contractor
- Dept. of Health – Hawkins House: Floors 3-11, Office and Toilets upgrade works : Mechanical Sub-Contractor.
- Dept of Agriculture - : Upgrade of Computer Rooms and Generator Installation : Main Contractor & Mechanical Sub-Contractor.
- Dept of Transport : Clair Street ; Refurbishment of offices : Mechanical Sub-Contractor
- Dept of Foreign Affairs, Harcourt Street : New IT and Computer room upgrades : Mechanical Sub-Contractor.

The quality and standard of Skellig Engineering's work and operating procedures were very high and they have proven that they can adapt and react to design and site changes with little difficulty while still adhering to the overall programme.

This was particularly essential and evident on a number of the above Projects involving computer room upgrades where working within existing occupied and operational buildings required pre-planning and attention to detail.

Their management of the Projects and of cost control and handling variations was to an equally high standard.

I would have no hesitation in recommending Skellig Engineering for any type of Mechanical Services contract.

Yours Sincerely

Joe Byrne
Director
